LinkedIn: *linkedin.com/in/hmftj*

Personality: *ENTP-A*

Marital Status: *Spinster*

Professional Summary

Innovative and solutions-driven Full-Stack Developer with 10+ years of experience in software engineering, IoT systems, and cloud integration. Proven track record of building scalable web applications with React and the MERN stack, architecting IoT-based embedded systems, and deploying infrastructure on AWS. Known for blending creativity with technical acumen to deliver impactful software solutions tailored to business needs.

Technical Skillset

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, TailwindCSS and Material & Ant Design.

Backend: Node.js, Express.js, REST APIs, GraphQL and Python / PHP.

Database: MongoDB, MySQL, MariaDB, SQL Server, Postgres.

Embedded Systems & IoT: Arduino, ESP32/8266, Serial Communication, Sensors & Actuators, NFC/RFID Integration and Renesis Controllers.

Cloud Platforms: AWS (EC2, S3, Lambda, CloudWatch, RDS), Firebase Google and MSSQL Azzure Cloud.

Other Technologies: Git/GitHub, Docker, WebSocket, MQTT, Jenkins, Figma, Adobe CC and Swagger, Nest and Vite JS.

Languages: C, C++, C#, Python, Java, PHP, D, F#, Ruby, XML, JSON and Javascript.

Professional Experience

Full-Stack CEO

TARA-Technologies, Lahore | Oct 2021– Present

- Built and maintained scalable applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js).
- Developed IoT systems integrating embedded devices (Arduino, ESP32) with web platforms for real-time monitoring and automation.
- Deployed microservices-based infrastructure on AWS, enabling high availability and fault tolerance.
- Led cross-functional teams through SDLC for projects in e-commerce, ERP, and machine learning.

Head of IT

Friendsfarm PVT LTD | Remote | 2018– 2021

- Migrated legacy systems to cloud architecture using AWS EC2 and RDS, reducing costs and increasing performance.
- Designed an IoT-enabled smart agriculture system with remote sensor data logging and real-time alerts.

Web Developer

BigCiti Real Estate Dha Phase 6, Lahore | 2017– 2018

- Created modular desktop and mobile applications integrating biometric attendance and smart sensors,
- Designed, developed and deployed ERP and Website.

Web Development Engineer

Zahra Fashion Designer | 2016 – 2017

- Created modular desktop and mobile applications integrating biometric attendance and smart sensors,
- Designed, developed and deployed ERP and Website.

Academic Background

- **BS (Hons.) in Computer Science**
University of South Asia, Tufail Road, Lahore Cantt
Grade: 3.53/4.00
(2013–2018)
- **FSc Pre-Engineering (HSSC)**
GBHS&IC, Tufail Road, Lahore Cantt
Grade: 1st Division
(2011–2013)
- **Matriculation in Computer Science (SSC)**
Leads Grammar School, Lahore Cantt

Grade: A
(2009–2011)

- **Hafiz-e-Quran**
Wafaqul Madaris, Lahore Cantt
Grade: Mumtaz
(2005–2008)

Projects & Highlights

- Smart Home IoT Dashboard: Built with React, Node.js, and MQTT; integrates Arduino-based devices and AWS IoT Core.
- Flood Forecasting System: Real-time analytics platform collaborating with NDMA using IoT sensors and cloud storage.
- E-Commerce Platforms: Developed scalable apps such as Freshees.pk, Khazina by Arubahs, Ans Salt & Trading, Sombre Designers, Aiza Boutique, Hassan Pasha Travels & Tours, Shaheen Travels, POSIMS for various Restaurants.
- Natural Object Explorer (ENO): Android app with NFC/QR scanning for real-world data interaction.

Certifications

- **AWS Certified Cloud Practitioner (in progress) 2025**
- **Solar Advanced Design and Implementation USA 2022**
- **IoT Applications with Arduino and Esp32/8266 2019**
- **Advanced Web HI-MERN NAVTTC APPGENII 2025**

Languages

- English (Fluent)
- Urdu (Native), Punjabi
- Deutsch, Ruski and Arabic (Elementary)

Hobbies & Interests

Passionate about outdoor activities such as traveling, hiking, and golf; enjoy creative pursuits

like playing guitar and crafting; maintain a healthy lifestyle through running and football; and stay mentally engaged with strategic video games.

Cover Letter

“Hafiz Furqan Tahir”

Dear Hiring Manager’s,

I am writing to express my strong interest in senior position at your organization. With more than 10 years of experience in full-stack web development, IoT solutions, and cloud deployment, I am confident in my ability to make a valuable contribution to your team.

At TARA-Technologies, I have spearheaded the development of full-scale applications using the MERN stack and designed embedded systems integrated with IoT sensors for industrial and smart home use. I have also implemented serverless and containerized solutions using AWS EC2, S3, Lambda, and RDS, ensuring reliability and scalability.

I’m passionate about solving real-world problems through software and hardware synergy. My recent work includes a smart irrigation system leveraging AWS IoT Core and an energy-efficient home automation app using React and MQTT.

I would welcome the opportunity to discuss how my background, creativity, and drive align with your company’s goals. Thank you for considering my application.

Sincerely,

Hafiz Furqan Tahir

House # SD-662, Street # 38
